

The National Robotarium Fact Sheet

The National Robotarium has a brand new robot pal! The robot is part of the “Spot” range made by American company Boston Dynamics.

Our experts will use the new robot to carry out research into how robots could do jobs that are too dangerous for humans! For example the robot could go into a building that had been damaged in an earthquake, to help find injured people! The robot has lots of special abilities allowing it to perform a range of different tasks.

Special Abilities

Waterproof so
can use in the
rain

Strong back to
carry heavy
equipment

14 Kg

Cameras and
microphones so
the robot can
see and hear its
surrounding

Top speed of
3 MPH

Can get back up
on it's own if it
falls over

Can walk over
uneven ground
and even climb
stairs!
