MSc in Civil Engineering and Construction Management

BE FUTURE MADE 2020/21
Modern civil engineering professionals often require an extensive understanding of construction management due to the strategic benefits it can bring to both individuals and project teams.

The programme provides a broad and valuable education. As a result, a range of national and international employers have employed our recent graduates with graduates working in areas such as transport, water and wastewater engineering and the energy sector.

You may also be interested in MSc Civil Engineering with Industry Placement (2 years) offered in Edinburgh.*

PROGRAMME STRENGTHS
• Specifically designed to advance knowledge in civil engineering and modern construction management theory and practice.
• Supported by a Civil Engineering Industry Advisory Committee, which includes representatives from major multi-national employers.
• Accredited as meeting the requirements for Further Learning for a Chartered Engineer (CEng) for candidates who have already acquired an Accredited CEng (Partial) BEng (Hons) or an Accredited IEng (Full) BEng/BSc (Hons) undergraduate first degree.

* Programme launched in 2019 and we are seeking accreditation for this programme.
