C69RP Research Preparation in English(1)

COURSE DETAILS
Course Code: C69RP
Full Course Title: Research Preparation in English(1)
SCQF Level: 9
SCAF Credits: 15
Available as Elective: No

DELIVERY LEVEL
Undergraduate: Yes  Postgraduate Taught: Yes  Postgraduate Research: No

COURSE AIMS
• To enable students to explore their intended research community
• To enable students to adopt a critical perspective as readers of academic texts
• To enable students to establish a rationale for doing their research
• To enable students to practise project management and communication skills at the start of a research project

LEARNING OUTCOMES – SUBJECT MASTERY
Students will gain knowledge of:

• the purpose structure and style of a range of research genres such as annotated bibliographies, critical reviews, proposals & posters
• how a research community builds and communicates knowledge

Students will gain skills in the following:

• Identifying research topics the community views as relevant & important
• Accessing relevant sources & information.
• Critically evaluating published and unpublished literature
• Relating operational definitions to data collection and analysis
• Putting forward an argument in a literature review, research report, poster or presentation
• Designing and carrying out a small scale pilot study

LEARNING OUTCOMES – PERSONAL ABILITIES
The student will be able to:

• Transfer skills and techniques associated with academic research to professional and
The student will be able to:

- Exercise autonomy and initiative in time management and project management related to the research process
- Take responsibility for their own work progress & record keeping
- Seek guidance where appropriate

The student will be able to:

- Evaluate and use published sources as evidence to support knowledge claims
- Evaluate and use research results as evidence to support knowledge claims

SYLLABUS

The syllabus will include but is not limited to the following topics relevant to the subject:

Scoping the research field

- comparing research interests in the department
- Investigating key journals and other publications which sustain research conversations

Finding resources for research

- Reading the literature critically and systematically to identify report structure, research purposes and contribution
- Compiling, categorising and prioritising relevant sources for an annotated bibliography

Establishing a rationale for doing research
• critically evaluating sources – finding limitations, problems and gaps
• identifying a real world context for data collection

Designing research

• Using sources to define concepts so that they can be measured (operationalising)
• Linking operational definitions to a rationale for using a particular research approach/methodology and data collection technique
• Writing research questions, aims and objectives
• Critically evaluating and writing research proposals?
