LEARNING OUTCOMES – SUBJECT MASTERY

Understanding, Knowledge and Cognitive Skills

To develop knowledge and skills in the elicitation and analysis of user requirements, design and evaluation of solutions, and the implementation and quality assurance of the chosen solution.
• To develop skills in working with technology users and members of organisations to find tailored technological solutions.
• To know what general classes of problems are amenable to computer solution and be able to select the appropriate tools required for particular problems.
• To develop the knowledge and skills required to meet the challenges of emerging technologies and methodologies.
• To be aware of, and be able to respond to, statute law, directives, standards and emerging common law relating to the use of computers.
• To develop knowledge of the aspects of management required to understand the commercial and business contexts within which information systems are used.
• To develop the entrepreneurial skills required to identify and exploit opportunities which arise as a result of technological developments and new business paradigms.
• To relate theory to practice and practical application.
• To show knowledge and understanding of some major current issues in the industry in which the student is working during their work placement.
• To show knowledge and understanding of the business environment of the industry in which the student worked during their work placement.
• To undertake critical analysis, evaluation and/or synthesis of ideas, concepts, information and issues.
• To use a range of approaches to formulate evidence-based solutions/responses to defined and/or routine problems/issues.
• To critically evaluate evidence-based solutions/responses to defined and/or routine problems/issues

Scholarship, Enquiry and Research (Research Informed Learning)

• To be able to identify and exploit new opportunities; to analyse problem spaces and design creative solutions; to appraise material and ideas; to apply a methodical and innovative approach to problem solving; to integrate theory and practice.

LEARNING OUTCOMES – PERSONAL ABILITIES

Industrial, Commercial and Professional Practice

• To maintain and update technical knowledge; to take responsibility for personal and professional development.
  • To appraise the impact of computers on society and the influence of society on the development of the technology and use of computers.
  • To assess aspects of the law related to computer-based information or the role of standards in safety, quality and security, of security issues and of the BCS Codes of Practice and Conduct.
  • To be able to use a range of routine skills, techniques, practices and/or materials, a few of which are advanced or complex
  • To be able to carry out routine lines of enquiry, development or investigation into professional-level problems and issues.
  • To be able to understand the commercial aspect of the company in which the student is working

Autonomy, Accountability and Working With Others

• To apply subject-mastery outcomes to monitor, analyse, model, specify, design, communicate, implement, evaluate, control and plan.
  • Exercise autonomy and initiative by planning and managing their own work; develop strategies for independently solving problems and taking the initiative.
  • Take responsibility for their own and other's work by contributing effectively and conscientiously to the work of a group, actively maintaining good working relationships with group members, and leading the direction of the group where appropriate.
  • Reflect on roles and responsibilities by critically reflecting on their own and others' roles and responsibilities.
  • Deal with complex professional and ethical issues including working with human subjects and wider issues relating to technology in society.
  • To be aware of, and be able to respond to, the social and legal implications and consequences of the use of computers.
  • To exercise autonomy and initiative in some activities at a professional-level
• To manage resources within defined areas of work
• To take the lead on planning in familiar or defined contexts
• To take continuing account of own and others' roles, responsibilities and contributions in carrying out and evaluating tasks
• To work in support of current professional practice, under guidance

**Communication, Numeracy & Information and Communications Technology**

• Use discipline appropriate software for data analysis, prototyping and learning.
• Present, analyse and interpret numerical and graphical data
• Communicate effectively, informally or formally, to knowledgeable or lay audiences.
• To convey complex information to a range of audiences and for a range of purposes
• To use a variety of forms of ICT effectively in the workplace

**APPROACHES TO TEACHING AND LEARNING**

Active group based classes, lectures, tutorials, practical classes, laboratories. Coursework, (assignments, individual projects, group projects, essays, reports, presentations, log/journals, dissertation). The course has been designed around a social constructivist approach to learning and will be based on active, experiential learning.

Approaches to teaching and learning are continually reviewed and developed with the aim of matching them to the abilities and experiences of students, with regard also for the subject area. Specific details about teaching and learning methods are provided in the appropriate course descriptors.

**EDUCATIONAL AIMS OF THE PROGRAMME**

The educational aim is to provide students with a unique blend of computer science, management and socio-technical systems. The course will prepare students with the technical, interpersonal, management and design skills required for IS management within organisations. They will also be provided with professional skills which will enable graduates to communicate clearly, work independently and co-operate effectively. The balance of skills will enable graduates to work effectively and efficiently in industry, commerce and the public sector, and will prepare them for postgraduate study. The industrial placement will encourage students to apply learning gained through their academic studies at the University to the workplace and enable students to gain work experience which will increase their employability and professional career readiness.

**ASSESSMENT POLICIES**
The following assessment methods are used:

*Understanding, knowledge and subject specific skills* are assessed through the range of methods reflected by written examinations, coursework assignments, software artefacts, group and individual projects, written reports and oral presentations. Diagnostic, formative, continuous and summative types of assessment aim to correlate with methods of assessment.

Approaches to assessment are continually reviewed. Specific details about methods of assessment are provided in the appropriate course descriptors.

**ASSESSMENT AND PROGRESSION (UG)**

**Reassessment Opportunities**

1. A student who has been awarded a Grade E or a Grade F in a course may be re-assessed in that course.
2. A student shall be permitted only one re-assessment opportunity to be taken at the Resit diet of examination following the first assessment of the course.
3. A student shall not be re-assessed in any qualifying course taken in the final stage of a course of study.
4. The Progression Board may permit a student to be re-assessed in any qualifying course not taken in the final stage in order to gain credits for the course, provided that the mark or grade obtained in the first assessment of any such course is used in determining the classification of the degree to be awarded.

**Progression Requirements**

**Part A.** The minimum number of credits required to progress through each stage are as follows

<table>
<thead>
<tr>
<th>Stage 1 to 2</th>
<th>120 credits (8 courses)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stage 2 to 3</td>
<td>240 credits (16 courses)</td>
</tr>
<tr>
<td>Stage 3 to 4</td>
<td>360 credits (24 Courses) and an overall average of 60% or above at the first attempt</td>
</tr>
<tr>
<td>Stage 4 to 5</td>
<td>Students who meet the criteria to progress to Stage 4 will automatically be allowed to progress to the final year.</td>
</tr>
</tbody>
</table>

**Part B.** The minimum grade of D is required in the following courses

**Stage 1**
Software Development (F27SA), Interactive Systems (F27IS), Web Design & Databases (F27WD), Introduction to Computer Systems (F27CS), Enterprise and its Business Environment (C17EC)

**Stage 2**
Interaction Design (F28IN), Database Management Systems (F28DM), Software Design (F28SD), Management in a Global Context (C17EB), Project management (C19PT), Operations Management (C18OM), Fundamentals of Marketing (C18FM)
**Stage 3**

6 courses including Software Engineering (F29SO) & Professional Development (F29PD). Re-assessment in Stage 3 is available for credit only and not to improve overall average.

**Stage 4**

Industrial Training Placement A (F28IA) and Industrial Training Placement B (F28IB) must be passed for the award of Diploma in Industrial Training.
