**Additional Information:**

**COURSE AIMS**

- To enable students to acquire and develop understanding, knowledge and skills related to business management  
- To develop student knowledge of the internal environment of the enterprise and its operations  
- Based on a value chain framework the course examines how businesses are organised to seek to fit internal and external operating environments.  
- To develop understanding of organisational forms and structures  
- To introduce students to the marketing function and business planning.  
- To develop student understanding of the interconnectedness between core elements of the business and its operation  
- To enhance business skills via an understanding of the practical application of theoretical knowledge through assessment and guest speakers (As available).  
- To assist the development of skills (particularly critical evaluation of academic research, diagnostic, problem solving, team/group working, communication, written, presentation and IT skills) through the both formative classroom based work and summative assessment.

**LEARNING OUTCOMES – SUBJECT MASTERY**

Students will gain skills in the following areas:

- The ability to analyse, evaluate, and report on the internal organisation of business and to contextualise this knowledge within the broader market.  
- The development and application of problem-solving skills to a range of theoretical and practical challenges.

Students will gain skills in the following areas:

- The ability to apply management frameworks and theoretical concepts to a case study organisation (linking theory to practice).  
- The ability to research and select secondary research into business management trends both independently and in groups (specifically through the coursework component of the module).  
- The ability to critically evaluate and assess empirical and theoretical evidence from management research.

**LEARNING OUTCOMES – PERSONAL ABILITIES**
Students gain the opportunity to develop their personal ability in the following areas:

- The opportunity to develop insight into a range of business practice through case study and practitioner talks.

Students gain the opportunity to develop their personal ability in the following areas:

- The ability to transfer theoretical and practical problem-solving skills to a variety of contexts.
- The ability to work independently and as part of a group. Tasks might include tutorial discussion and debate.

Students gain the opportunity to develop their personal ability in the following areas:

- The ability to communicate and present ideas effectively by verbal and written means.
- The ability to develop an interest in current developments in business management
- The ability to know how to use a range of online sources of knowledge through both library databases and WWW.
