### COURSE AIMS

- To acquire knowledge about managing operations & resources in organisations of various sizes; private, public & not-for-profit.
- To explore basic strategic & managerial perspectives & frameworks of operating systems.
- To develop an understanding of the many internal & external factors that impact on the development of effective operating systems.
- To recognise & appreciate the role of technology & its impact on operations management.
- To appreciate the impact decisions made by operations managers have on an organisation's competitive performance.
- To evaluate the role of the Operations Manager.
- To explore the international dimension of Operations Management.

### LEARNING OUTCOMES – SUBJECT MASTERY

- Describe & explain the operations management concepts and techniques which can be used to support management decision making.
- Understand and use new developments in operations management thinking.

- Solve real operational problems by the application of theoretical and analytical operational models.
- Develop the ability to research a particular dimension of operations management.
- Develop analytical & evaluation skills.
C18OP Operations Management
