COURSE DETAILS
Course Code: C69RQ
Full Course Title: Research Preparation in English (2)
SCQF Level: 9
SCAF Credits: 15
Available as Elective: Yes

DELIVERY LEVEL
Undergraduate: Yes  Postgraduate Taught: Yes  Postgraduate Research: No
Additional Information:

COURSE AIMS
- To enable students to construct themselves as researchers in preparation for joining their research community.
- To enable students to adopt a critical perspective as writers of academic texts
- To enable students to justify the use of a specific methodology
- To enable students to practise project management and communication skills to complete a research project and deliver a report

LEARNING OUTCOMES – SUBJECT MASTERY

Students will gain knowledge of:

- the purpose structure and style of a range of research genres such as annotated bibliographies, critical reviews, proposals & posters
- how a research community builds and communicates knowledge

Students will gain skills in the following:

- Identifying research topics the community views as relevant & important
- Accessing relevant sources & information.
- Critically evaluating published and unpublished literature
- Relating operational definitions to data collection and analysis
- Putting forward an argument in a literature review, research report, poster or presentation
- Designing and carrying out a small scale pilot study

LEARNING OUTCOMES – PERSONAL ABILITIES

The student will be able to:
Transfer skills and techniques associated with academic research to professional and workplace contexts

The student will be able to:

- Exercise autonomy and initiative in time management and project management related to the research process
- Take responsibility for their own work progress & record keeping
- Seek guidance where appropriate

The student will be able to:

- Evaluate and use published sources as evidence to support knowledge claims
- Evaluate and use research results as evidence to support knowledge claims

**SYLLABUS**

The syllabus will include but is not limited to the following topics relevant to the subject:

**Ethics of research**

- Understanding the ethical impact of research on the rights of other researchers, research subjects and others affected by the research

**Assessing the reliability of research findings**

- Evaluating research evidence (findings) on the basis of the data collection methods that produced it
- Integrating non-verbal material such as figures and diagrams into a developing argument in a research report

**Establishing a theoretical context for research**

- Writing a critical review of related sources
- Structuring a literature review which puts forward an argument for doing research and for using a particular methodology and data collection technique

Carrying out the research
• Defending research outcomes in a poster or in a viva
• Analysing and writing up a focused case study

Reflexivity

• Reflecting on learning outcomes
• Understanding the impact of the researcher on the research process
