**Additional Information:**

**COURSE AIMS**

- Improve students’ critical analysis skills in computer network security and allow them to identify network security threats in a systematic way.
- Provide the student with in-depth understanding of penetration testing concepts and methodologies.
- Give practical experience of exploiting vulnerabilities in common computer system architectures.
- Impart a deep understanding of common techniques to implement countermeasures.

**LEARNING OUTCOMES – SUBJECT MASTERY**

At the end of this course, the students will be able to:

- Identify and explain vulnerabilities of network protocols.
- Design and implement countermeasures to protect a network from unauthorised network access.
- Identify threats and implement measures to protect against threats in wireless networks.
- Test and evaluate the security of an IT infrastructure.

**LEARNING OUTCOMES – PERSONAL ABILITIES**

- Ability to critically appraise the security of an IT infrastructure.
- Showing teamwork skills and being an effective member of a penetration testing team.
- Develop a set of ethical best practices needed for a security career.
- Ability to make decisions regarding how to secure a system in absence of a complete picture of its configuration.

**SYLLABUS**

- Wireless Security: Wired Equivalent Privacy (WEP) vulnerabilities, Wireless Protected Access (WPA) and IEEE802.11i
- Penetration testing: penetration testing process: Reconnaissance, Scanning, Gaining access, Maintaining
F21AN Advanced Network Security

- access, and Covering tracks.
  - Digital Forensics: introduction, EnCase and open source tools.
  - Privacy and P3P.

Information on Pre-requisites:-

A good understanding of fundamental computer security topics such as might be obtained by taking F21 CN Computer Network Security is pre-requisite.
