F21EC e-Commerce Technology

COURSE DETAILS

Course Code: F21EC
Full Course Title: e-Commerce Technology
SCQF Level: 11
SCAF Credits: 15
Available as Elective: No

DELIVERY LEVEL

Undergraduate: Yes  Postgraduate Taught: Yes  Postgraduate Research: No

Additional Information:

COURSE AIMS

- To impart an understanding of e-Commerce technology and of how Information Systems play a fundamental role in shaping e-Commerce;
- To provide technical know-how for developing, managing and evaluating the different types of e-Commerce;
- To provide analytical skills to examine and optimise the technical aspects of e-Commerce;
- To equip students with skills for the effective implementation of cyber-security measures to protect e-commerce platforms, following industry standards;
- To enable students to acquire knowledge in using data analytics to support the e-marketing and CRM components of e-Commerce;
- To provide a description of technological challenges and innovations in e-Commerce;
- To impart an understanding of the integration and the interoperability aspects of e-Commerce in the whole business system.

LEARNING OUTCOMES – SUBJECT MASTERY

- Critical understanding of the different types of business models, revenue models and business systems used in e-Commerce;
- In-depth and practical knowledge of the use of web related technologies that enable e-Commerce applications;
- Insights into the implementation of strategic and standard security measures to protect e-Commerce platforms;
- Demonstrate comprehension and practice in the application of data analytics to enable rich customer experience.
F21EC e-Commerce Technology

LEARNING OUTCOMES – PERSONAL ABILITIES

- Can deal with complex issues and make informed judgements about the use of web based technologies in e-Commerce;
- Can independently carry out research based on literatures in the field of e-Commerce technology;
- Can evaluate real-world e-Commerce and propose technical solutions to different business scenarios.

- Exercise substantial autonomy, initiative and creativity in the application of technologies for the development of e-Commerce applications;

- Can communicate and work with peers, more senior colleagues and specialists and demonstrate critical reflection (PDP);
