F28SX Software Design

COURSE DETAILS
Course Code: F28SX
Full Course Title: Software Design
SCQF Level: 8
SCAF Credits: 15
Available as Elective: No

DELIVERY LEVEL
Undergraduate: Yes | Postgraduate Taught: No | Postgraduate Research: No

Additional Information:

COURSE AIMS

• An introduction to a range of processes and methods that promote the design of high quality software systems.
• A perspective of where design sits within the development life-cycle.

LEARNING OUTCOMES – SUBJECT MASTERY

• To demonstrate a critical understanding of software process models and design methods.
• To be able to develop design solutions using a range of structured notations.
• To demonstrate a critical understanding of the context in which software design takes place, in particular requirements engineering and the activities of validation and verification (testing).

LEARNING OUTCOMES – PERSONAL ABILITIES

• To be able to use appropriate methods and standards for practice and documentation in software engineering and information systems.
• Demonstrate evidence based approaches to problem solving.
• Use a range of numerical and graphical skills in evaluating and communicating ideas, as well as measuring progress toward achieving goals.
• To be aware of distinctive features of industrial practice
• To be able to identify, define, and analyse alternative project scenarios
• Take moderate responsibility for their work and exhibit critical reflection on development process
• To be able to relate learned knowledge to a work-based environment

SYLLABUS

• Software process models;
• Architectural styles;
• Design methods and associated notations – including function-oriented, object-oriented and component-based design; design patterns;
• Software development life-cycle issues, with particular focus on requirements engineering, validation and verification (testing).
