**COURSE DETAILS**

**Course Code:** F20AD  
**Full Course Title:** Advanced Interaction Design  
**SCQF Level:** 10  
**SCAF Credits:** 15  
**Available as Elective:** No

Additional Information:

**COURSE AIMS**

The course aims to give students the opportunity to develop:

- A detailed and critical knowledge of requirements gathering, design and evaluation techniques in interaction design.
- An awareness of current research and emerging issues in the field of interaction design.
- A range of specialised skills, and research methods involved in working with users.

**LEARNING OUTCOMES – SUBJECT MASTERY**

Students will develop skills in the following areas:

- Review, analyse, and evaluate previous research projects in the field of interaction design.
- Propose solutions in response to analysis of users’ requirements.
- Make informed judgements about appropriate methodologies for developing and evaluating technologies suitable for user demographics and background experience.

**LEARNING OUTCOMES – PERSONAL ABILITIES**
F20AD Advanced Interaction Design

- Present, analyse and interpret numerical and graphical data gathered as part of evaluation studies.
- Communicate effectively to knowledgeable audiences by preparing formal and informal presentations and written reports.
- Develop an awareness of professional and ethical issues including working with human subjects and wider issues relating to technology in society.

- Exercise autonomy and initiative by planning and managing their own work; develop strategies for independently solving problems and taking the initiative.
- Take responsibility for their own and other's work by contributing effectively and conscientiously to the work of a group, actively maintaining good working relationships with group members, and leading the direction of the group where appropriate.
- Reflect on roles and responsibilities by critically reflecting on their own and others' roles and responsibilities.

- Use discipline appropriate software for data analysis, prototyping and learning.

SYLLABUS

Current and emerging topics in Interaction Design including: user demographics, patterns in technology adoption, interaction design lifecycles, user interface design patterns, prototyping methods, a range of qualitative and quantitative data gathering and analysis techniques, accessibility, and a range of research case studies covering issues in the field.

Note on pre-requisites:-

Pre-requisite for this course is F28IN Interaction Design or equivalent.
