### COURSE DETAILS

**Course Code:** F28PL  
**Full Course Title:** Programming Languages  
**SCQF Level:** 8  
**SCAF Credits:** 15  
**Available as Elective:** No

### DELIVERY LEVEL

<table>

**Additional Information:**

### COURSE AIMS

- To gain understanding of different language paradigms
- To gain understanding of defining concepts of programming languages
- To develop skills in programming in languages from key paradigms

### LEARNING OUTCOMES – SUBJECT MASTERY

- Understanding of distinguishing characteristics of language paradigms
- Understanding of relationships between languages
- Understanding of generic language concepts
- Ability to program in languages from key paradigms
- Ability to use tool sets for these languages

### LEARNING OUTCOMES – PERSONAL ABILITIES

- Understanding of how to choose an appropriate language for different problem domains

### SYLLABUS

- Overviews of language history, definition (lexicon, syntax, semantics), implementation (compiler, interpreter, virtual machine)
- Overviews of language paradigms: e.g. imperative (high-level, system, low-level), declarative (functional, logic), concurrency/parallelism
- Overviews of programming language concepts: variable, lvalue & rvalue, assignment (sharing/copying), data abstraction (sequential, structured, recursive, shared/distributed), type mechanisms (weak/strong, static/dynamic, ad-hoc/parametric polymorphism), declaration (scope, extent), control abstraction (sequence, choice, repetition, block, procedure, labels/jumps, exceptions, processes), expression abstraction (functions), parameter mechanisms (value, reference), evaluation mechanisms (strict/lazy, ordered/unordered, concurrent)
- An introduction to programming in languages from key paradigms e.g.
  - Scripting: e.g. Python
F28PL Programming Languages

- declarative/functional: e.g. SML
- declarative/logic: e.g. Prolog

NOTE: Course F17LP Logic & Proof, (or its equivalent), is also a pre-requisite for this course.
