

Information Security

Protecting our information

Sure you want to click on that link?

You could be in for a nasty surprise!

Viruses can lurk in attachments and links in emails. It just takes one click to infect your data and the whole system.

When opening emails,

Don't click on links you don't know

**Don't download any attachments
from email addresses you don't
recognise.**

Don't let malware hold your data to ransom.
